

## REAR SEAT BELTS

### T2 BAY 1968-1979

**JK Part Numbers: J10652**

*NOTE: Post August 1967 models that have the second digit of the chassis number as a 2, 3 or 4 all have the mountings fitted from the factory (1).*

1. Factory fitted mountings

Depending on the layout of your Camper interior, you should be able to fit lap belts and/or 3 point inertia reel belts (2).

On models that do not have mounts as standard, you can drill your own holes in the rear bulk head (3) / wheel arch tubs.

*NOTE: The fuel tank resides behind the rear bulk head.*

If you do not have factory fitted mounting points and have drilled your own holes, you will need to install a stress plate (Part No.J11582) on each mounting point to ensure the bolt can not pull through the body work in the case of an accident.

*NOTE: please ensure that any mounts are installed by someone who is capable of welding to MOT standards.*

*NOTE: It is very important on Campers that cushions are well secured (4), otherwise in an accident, the cushions may move and may result in serious injury*

*NOTE: If you have any doubts about fitting, contact a reputable garage*

2. Inertia reel seat belts

3. Non standard mounting in rear bulkhead

4. Cushions must be well secured

*N.B. Whilst every attempt is made to ensure that these instructions are as accurate and clear as possible, we cannot be held responsible for misinterpretation of these instructions or for any subsequent accident or damage caused through mis-fitted parts.*
