### FITTING GUIDE

Both the Type 2 and T25 jail bars are pre-cut to the correct size to fit the window on your van. You will find the top bar slightly smaller in length to match the profile of the window frame.

1. First find the centre of the rear window and mark it. Align the middle of the centre bracket on the mark and mark the position of the fixing holes. Drill the fixing holes making sure to use the correct drill bit for the screws provided.

2. Attach the centre bracket to the van. Now slide the bars through the two holes within the centre bracket making sure the smaller bar is on top. Fit the four end brackets to the bars. Mark the hole positions on the end brackets on the tailgate, making sure the bracket has not protruded onto the tailgate seal. Once again, drill the holes and fix the end brackets.
