

Where others just track...
we get it back!

SURETRACK
COVERT TRACKING

"We've used the tracking system created by Sure-Track to successfully recover plant machinery that had been stolen and then transported around the world".

DC Vince Wise – Hampshire Police

"It's certainly well worth having because it gives you good peace of mind. I was extremely pleased how my caravan was tracked and then pinpointed within hours of being stolen".

George Heath – Northampton

"Sure-Track have monitored our fleet since 2004 – over the last 5 years they have recovered around £100,000 worth of equipment. We are delighted with the service provided and value the dedication of the Bureau team."

Anita Tyler – MTS Bobcat
